THE WINDERMERE HOTEL

Originally called the Riggs Windermere Hotel, named after Thomas Rigg who built it in 1847, the hotel opened at the same time as the railway from Oxenholme to Windermere. The hotel name has changed but the hotel and railway station remain and greet most visitors on their way to Windermere. A recent refurbishment of the bar and restaurant has left us a really warm modern look that returning guests love, but the hotel still retains a lovely old feel, true to it's railway heritage.

LOCAL INSIGHT

I have never known a place where views change so much during the day as sunshine and rain highlight the landscape beautifully. Just a simple drive in The Lakes is a lovely experience, the same road in the other direction gives a totally different perspective and view – never a dull day out in the Lakes! Very often my days off are spent relaxing with a great walk. My local's

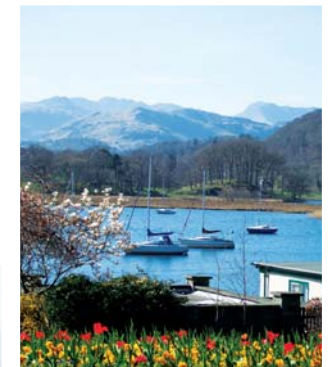

“hot tip” would be walking to Miller Ground. It is a lovely walk that ends at the lake itself with beautiful views over to the hills on the other side.

It's also an easy walk to the pubs and restaurants in Windermere.

Melise, Receptionist

“Our room had a magnificent view over Lake Windermere”

Our location set high above the town of Windermere gives us beautiful views over the lake, a stunning setting. Guests can stroll into the town and for the more energetic the lake itself is just a 20 minute walk.

For a special occasion our Premier rooms with views across to the lake are a must!

Giles Norwood, General Manager
